Thanks. This was the first Souls game I ever played so it deff has a special place in my \u2665. But if you're reading this and haven't played any of the Souls games, I don't recommend starting with this one. It's the most clunky, many areas have questionable mob placements (Shrine of Amana), weird hitboxes and i-frames (rolling in this game is pretty horrible). On the other hand the lore is great and I enjoyed most of the characters.. Good modelling, good texturing, good sounds, good dynamics. Highly recommended.. This is one of the seven DLCs that come with the Alien Isolation Season Pass/Compete Collection. Two (Last Survivor/Crew Expendable) are story DLCs that let you play as characters from the original Alien movie, as you recreate classic scenes. Those two DLCs are awesome, non time-based content packs that I would recommend to anyone wanting between 1-1.5 more hours of content, or anyone looking for an exciting nostalgic experience. However, the rest of the DLC is "Survivor Maps" where you play as a random character (more unlock with each DLC) completing random objectives, in new maps that aren't featured anywhere else in the game. They will likely only be fun to those who:

- 1) Like the game so much, but want even more content
- 2) Are looking for a challenge (because there is no save points)
- 3) Are looking for a more "arcade-like" Alien Isolation Experience (You never know what objectives you will get, which paths you will take, which enemies you encounter, and there is a time limit on each challenge.)

If you fit into any of the categories above, you will like the Alien Isolation DLC. If you don't, I would suggest getting just crew expendable/last survivor DLC, or none at all.. Probably the best game I've ever played, honestly. I love reading, and the story in this "game" really pulled me into it. Would recommend to anyone that likes reading.. Game Information

Northern Tales is a *Strategy game that was developed by Realore Studios and published by Qumaron.*

Game Visuals

I want to mentioned that the visuals in the game is well done. The visuals can be adjusted in the game's option menu.

Game Audio

I want to mentioned that audio for the game is well done. Even though the audio is somewhat simplistic and repetitive. The audio can be adjusted in the game's option menu as well.

Gameplay

This is a strategy game, where careful planning is required, due to limited amount of resources that are available.

There are three different difficulty game modes to choose from: Normal; Multi-task; Relaxed. The difference between these difficulty game modes are: Timer Speed and Scoring. The normal mode, the timer speed and scoring is low. The multi-task mode, the timer speed and scoring are moderately high. The relaxed mode, the timer speed is frozen and scoring is moderately high.

There are three different chapters. All the chapter has fifteen regular level and a bonus levels. All levels can be replayed for better scoring and star rating.

All levels has three star rating system. The stars are earned from playing the game. The star rating system represents how fast the levels has been completed. Three Stars (Gold;) Two Stars (Silver;) One Star (Bronze.) There is an opportunity to replay levels for better star rating.

There are several different special power ups to help complete the level faster. These special bonus power ups comes with a time limit. But they can be used again after they have been recharged overtime.

There are fifty-eight different achievements that can be unlocked from playing the game. Each of these achievements does come with some requirements that needs to be completed before they can be unlocked. These achievements are in-game only.

Miscellaneous

Final thoughts: I have found the game enjoyable to certain extent. The replay value for the game is low. I would recommend this game, but not at the game's full price value.

As someone who has created textures for sims, I am blown away by the consistency and beauty of the texture work these guys do. Of course I'd prefer some higher res textures here and there, or at least that option. But they do have to keep file sizes on this side of galactic; some folks have several terabytes worth of textures in their sims. At 10 bucks, this is a no brainer when you consider what other add-ons can cost for P3d\FSX. You can spend more for a single scenery area in FSX than this entire sim + this add on offer. While it's not quite ORBX level of detail, I can't say I've seen an overall better looking and performing product. I look forward to the system depth and customizability that will kick this sim into first place on the market.. I have 2 things why i dont like this game:

- ALL the DLC, its just greedy

- The Light Line\MonoRail build system, most of the times i cant finish the tracks because you need to perfectly align them with each other, and auto-complete doesn't help.

- . fixed resolutions

- bad turn tactics gameplay

- bad music. Nice Emotes. There's crazy dancing ones.. goob thingss
